Year 2 Spring 2

Where do Animals Live?

Where in the world would I find a hot and cold place?
What is a habitat?

This half term we are learning about David Attenborough, the famous naturalist. We will learn about the things that he does as an expert in natural history.

As **Scientists** we will learn living things and their habitats. We will be exploring and comparing different living animals and where they live.

As **Artists** we will learn how to use Styrofoam to recreate images of animals or animal environments. We will explore how to use tools correctly to shape and create the image in Styrofoam.
We will study the artist Jessica Rollit.

As **Geographers** we will be studying the differences between hot and cold places. We will name some important hot and cold places and understand how the equator links into this.

Trips and Visits

This half term we will be going to Marwell Zoo. This visit links to our work in Science and Geography.

Vocabulary... ask me what these words mean...

cold place, hot place, country / continent, Equator, North/South pole, climate, foreign, equator, caption, label

Hook

A box of artefacts will arrive! It will contain a cactus, different photos of a desert, rainforest and the arctic. What is the link? Where do these places come from?

Outcome

We will make our own habitats and create our own prints.

Stand Alone Subjects

In PE, we will learn to...

We will learn how to send and receive and throw and catch a ball.

We will continue to learn swimming skills and safety in and around the pool.

In Personal Development we are going to...

Learn about the word relate and explore what it means.

In RE we will think about...

How Christians welcomed Jesus.

In Computing we will learn to...

Collect data and group it together using pictograms and learn more about E-safety and managing Online Information.

In music we will learn to...

Follow a steady beat and begin to use notation to create and perform our own minibeast song.

We also have forest school this half term. Don't forget to bring a coat and your wellies or a change of shoes, as it can get very muddy!
