Coasts and Rivers Year 4 Summer 2

Can you recognise the different features of a river and how the landscape impacts this?

Where would you rather live atop a mountain or in a valley?

What is a coast?

This half term we are learning how to be marine scientists

As Geographers we will be studying rivers and coasts and going to Southsea to complete a field study

As Scientists we will be studying the digestive system and how our bodies get nutrients from our food.

As Artists we will be studying the work of Claude Monet and will be creating a landscape painting

Vocabulary... ask me what these words mean...

Geography - erosion, deposition, meander, tribute

Hook

Debate - Where would you rather live atop a mountain or in a valley?

Outcome

Learn the skills to be a marine scientist. Fieldtrip to Southsea beach to further our rivers and coast unit

Stand Alone Subjects

In P.E we will be learning different Athletics skills in the view to perform at the highest level achievable in school sports day. We will also be continuing to develop our skills as swimmers in this term

In Personal Development we will be economic wellbeing and how we grow and change.

In R.E we will be learning about change.

In music we will be continuing to learn how to play the guitar.

In computing we will be learning programming.
